Background

I'm scheduled to my studies at [HIT](#) university by April 2025. After that I seek to work at software developer. I seek to write the upmost quality code one can write. I take great pride in my dedication and love for desire to improve.

Projects

Vibe Coding – University Projects

New and revolutionary course at HIT. Centered on making Vibe Coded projects. Not that I can't program these things without AI, but using AI is faster (as of right now). I used [Gemini](#) for creating specs and [Google AI Studio](#) for building these apps.

1. [Magic Calculator](#)

Social Network – React

Social media network made with react. Read more at <https://github.com/AntonGorov195/social-network-for-hit>.

keywords: [React](#), [Socket.io](#), [MongoDB](#), WebSockets, [Node.js](#), [AI](#), [JWT](#)

Android Kotlin – Cat API Application

Android app for searching cats. Read more at <https://github.com/AntonGorov195/catsapp>.

keywords: [Android Studio](#), [Kotlin](#), [CatAPI](#), [Retrofit Remote DB](#), [MVVM Architecture](#), [ROOM Local DB](#), [LiveData](#), [HILT Dependency Injection](#).

HTEduZone – Online Study Platform

Industry Project for HIT university, Read more at <https://github.com/AntonGorov195/EduHITZone>

keywords: [Go\(lang\)](#), [MySQL](#), Open AI API, [HTMX](#)

Wall 2 Wall – Arcade Game

Simple arcade game about bouncing a ball from one wall to another by shooting other balls at it. Read and play at <https://antongorov195.github.io/projects/wall-2-wall-details>

keywords: [JS](#), [HTML](#), [WASM](#), [Odin](#), [Raylib](#)
